

June 18, 2004

The Honorable William H. Frist, MD
United States Senate
S-230 The U.S. Capitol
Washington, DC 20510

Contact: Peggy Tighe x442

Dear Dr. Frist:

For our physicians and the patients they serve, the undersigned state and national medical specialty societies strongly urge a prompt vote on S. 720, the "Patient Safety and Quality Improvement Act." S. 720 is an important quality improvement initiative because it would create a system in which health care professionals share and analyze information about errors to prevent similar incidents from recurring. This voluntary reporting system enables physicians, hospitals and other health care providers to report information on errors to Patient Safety Organizations (PSO) that would confidentially collect and analyze the information. The PSO would also provide patient safety improvement strategies based on the data. Currently, there is a disincentive for physicians and other health care professionals to engage in a reporting system because of the fear of litigation. The program is modeled after a similar system set up in the aviation industry. Aviation safety has improved dramatically because pilots and ground crews can report mistakes without fear of retribution.

S. 720 would provide the same option for physicians and other health care professionals. Similar legislation, H.R. 663, passed the House of Representatives in March 2003, by a vote of 418 to 6. S. 720 was unanimously reported out of the Senate HELP Committee in July 2003. The time for Senate action is quickly running out.

We urge you to support a floor vote on passage of S. 720 in the near future and to facilitate resolution of differences with the House-passed bill. Patient safety legislation is too important for further delay. Thank you for your commitment to America's patients.

Sincerely,
