

ROYAL COLLEGE OF SURGEONS IN IRELAND
123 St. Stephen's Green, Dublin 2

CORONARY ARTERY SURGERY WORKSHOP

Friday 3rd September 2010

Sponsored by

This one day Workshop is aimed at surgeons in training pursuing a career in adult cardiac surgery (either HST or BST) or other surgical trainees interested in microvascular anastomotic techniques.

The Workshop will provide ample proximal and distal coronary anastomosis training in the wet lab for twelve trainees, closely supervised and coached by consultant cardiac surgeons. The atmosphere will be informal with anastomoses tested and a prize awarded for the best example.

At the end of the course the participants should be competent in handling microvascular instruments and completing proximal and distal coronary anastomoses with different conduits.
